

HARBORLINE TECHNOLOGIES, INC.

INFORMATION SECURITY SUMMARY (NEW-HIRE PACKET)

Policy companion POL-SEC-005-SUM | Controlling policy: POL-SEC-005

Also read: acceptable-use-policy.txt (POL-SEC-005-AUP)

Effective 1 January 2026 | Revised 1 September 2026

Security 24/7: +1-206-555-0199 | security@harborline.example

Phishing: phishing@harborline.example

WHY THIS SHEET EXISTS

Harborline hosts operational data for logistics, field-service, and wholesale customers. This one-pager is what goes in the week-one packet. It does not replace POL-SEC-005. Production and customer access stay blocked until you finish the 90-minute Harborline Learn security module (POL-ONB-007).

DATA CLASSES

- Public: marketing site, published blogs, job ads. Share freely.
- Internal: org charts, this policy set, ordinary Slack. Employees and signed contractors.
- Confidential: compensation, home addresses, unpublished roadmaps, CRM names. Named access on Company systems only. No personal email.
- Restricted: production customer data, credentials, payment data, production logs with payloads, government IDs. Production VPC / approved admin tools only.

When unsure, use the higher class. Screenshots inherit the source class.

Restricted exports expire in 30 days. Delete them when the ticket closes.

IDENTITY

Okta + MFA on every internet-facing app. Preferred MFA is a hardware key for admins, otherwise Okta Verify. SMS MFA is a 7-day recovery method only.

1Password is the password manager. Unique 16+ character passwords when SSO is impossible. Never paste a password into Slack.

DEVICES

Company laptop only (POL-EQP-008). Full-disk encryption, 5-minute screen lock, EDR agent stays installed. No BYOD laptops. Personal phones: work profile for Slack / MFA / email only; no production VPN. USB blocked unless Security approved. Lost or stolen: call +1-206-555-0199 immediately.

WHERE YOU MAY WORK

Hub Wi-Fi or home office on WPA2/WPA3. VPN required for production, payroll, and Restricted systems. Cafe / coworking: Internal and Public work only. Never admin production or open payroll from a shared table (POL-RMT-003).

AI TOOLS

Use the approved internal assistant for Internal material. Do NOT paste Confidential people data, Restricted customer data, credentials, or unpublished security findings into ChatGPT, Claude.ai, Gemini, consumer Copilot, or other public models. Customer contracts that forbid AI-assisted work win.

INCIDENTS ? ONE HOUR

Call +1-206-555-0199 if it is active (session still open, laptop still missing, ransomware note). Email security@harborline.example with what, when, which systems, and whether a customer might be affected. Do not power off unless told (except disconnect Wi-Fi for ransomware). Do not brief customers until Security and Communications agree. Good-faith false alarms are encouraged.

PHISHING

Report Phish button or phishing@harborline.example. Finance will never change a vendor bank account by Slack alone.

PHYSICAL

No tailgating. Shred Confidential paper. Wipe street-facing whiteboards. Report a lost badge the same day.

VENDORS

No shadow vendors on a personal card for customer data. Contracts + DPA when Confidential or Restricted data is involved.

EXCEPTIONS

Only the Head of Information Security (or delegate) can approve USB, SMS MFA beyond 7 days, personal-device production access, or a public-AI use case. Exceptions expire. Slack is not an approval record.

LEAVE / LAST DAY

Confidentiality survives employment. Return keys, badge, YubiKey, and laptop within 10 days (POL-EQP-008). Do not self-wipe the disk.
